Secondary Logo

Basic Idea Of The Logo

	Dot and Comma Our logo represents the fundamental building blocks of code, the comma (,) and the period (.). Just as these simple symbols combine to create complex digital instructions, we bring together expertise and creativity to craft powerful digital solutions.
	Two Strips The two interlacing strips in our logo represent the weaving together of code and creativity. Just as weaving creates something strong and beautiful from individual threads, we combine technical expertise with strategic thinking to craft seamless digital solutions.
	Lamp Shape And finally, the lamp shape evokes the illumination of your ideas, showcasing how we turn your digital wishes into reality. This adds a touch of whimsy and emphasizes the transformative power of our services.

Primary

Secondary

Montreal

Our chosen typeface, MontrealSerial-Xbold-Regular, takes center stage, serving as the exclusive font for all typography across both print and web platforms.

Montserrat

Montserrat takes the spotlight as our secondary font. This typeface will grace all our print and web typography, adding a distinct and complementary voice to our brand message.
